**Dr. Fraker, Insurance Swindler, Arrives in Kansas City.**

**Five Charges of Attempt to Obtain Money Under False Pretenses.**

If He Is Found Guilty on Each He May Be Sent to Prison for Thirty-Five Years—Steps Taken to Recover the Insurance Money.

KANSAS CITY, Sept. 4.—Dr. George W. Fraker, the insurance swindler, arrived in Kansas City Tuesday evening in the custody of his captors, and was at once placed in the jail of Jackson county. He was met at the depot by the sheriff of Ray county, who placed him under arrest on five charges of attempt to defraud and obtain money under false pretenses.

It was in Ray county that Dr. Fraker pretended to fall into the river and drown, and as that act was the principal one in a series to defraud the insurance companies, he will be prosecuted there. If he is found guilty on each of the five charges made against him, he may be sent to prison for 35 years, 7 years on each charge.

At the same time that criminal prosecution was begun against Dr. Fraker, steps were taken to recover the insurance money which had been paid to Judge Lincoln, the executor of the estate, and Tuesday morning before Judge Foster, in the federal court here, attorneys for five of the defrauded insurance companies filed five suits. They were against James W. E. Lincoln, executor of the estate, George W. MaGruder, trustee for the Fraker orphans; W. E. Fowler, judge of the probate court at Liberty; Nancy J. MaGruder and Cynthia A. Hatfield, sisters of Dr. Fraker and the Commercial Savings bank at Liberty, Mo. The petition in each suit reviewed the facts of the insurance policy on Dr. Fraker's life being in force on July 10, 1903, when he disappeared and falsely and fraudulently pretended to be dead and conspired with James Tripplett, Geo. Harris, Jake Crowley and others to pretend that he was drowned in Ray county.

The petition recites that Fraker left a will by which Judge Lincoln was made executor and his sisters and nephews made his heirs; that the heirs demanded the \$58,000 insurance money, which was refused, and that suit was brought and judgment obtained against the insurance companies by the heirs. It states that the evidence by which this judgment was obtained was perjured. The judgment had been paid to Lincoln August 12 and September 1, and it was discovered that Dr. Fraker was alive in Minnesota. The court is asked to set aside the judgment which was rendered in favor of the Fraker heirs, and that Lincoln and MaGruder be ordered to pay back the judgment money, the principal and interest, and that Judge Lincoln and the other defendants be enjoined from paying out any of the money.

Judge Foster made the order of injunction as asked, which will be in force till the United States circuit court meets here early in November, when Judge Phillips will reopen the case, set aside the judgment and order the money returned to the insurance companies.

How much of the money paid over to Judge Lincoln has been paid over to the Fraker heirs is not known.

The Modern Woodmen of America will recover the whole of the \$2,000 policy held in that order by Dr. Fraker. This money was paid to Miss Uter, clerk of the United States court, in a check and it still remains in her hands. Judge Lincoln having neglected to call for it. By an agreement of the attorneys this check will be held by Miss Uter until the final settlement of the case before Judge Phillips.

**AT INDIAN HEAD.**  
Armor Plate of the New Battleship Iowa to Be Tested.  
WASHINGTON, Sept. 4.—Wednesday at the naval ordnance proving grounds, Indian Head, Maryland, a ballistic plate representing the side armor of the new battleship Iowa will be subjected to a trial of its durability in such a manner as to show how it would fare if actually in position on the vessel. To attain this end a structure representing a section of the side of the Iowa has been constructed and to this plate has been attached.

The naval ordnance bureau hopes to give knowledge by the experiment as to whether or not the additional resistance is given to a plate through its attachment to the flexible structure, representing, as it does, the flexibility of a ship's side. With one exception in England, there is no record of any similar test by any country. The test will probably last two days.
